NYINGI ENTERPRISES CORP.

CAPABILITIES STATEMENT | ENTERPRISE & DEFENSE AI/ML • CLINICAL & DOCUMENT INTELLIGENCE

Secure Local LLM/SLM Fine-Tuning • Agentic AI • Formal Verification • Intelligent Document Processing • Clinical Audit & CDI

UEI: V1Q7UE8UBVY6 | **CAGE:** 9SRW4
SBIR ID: SBC_002504595
STATUS: WOSB • SDB • Minority-Owned SB
PRIMARY NAICS: 541715, 541511, 541519
GSA SMARTPAY / P-CARD: Accepted

COMPANY SNAPSHOT

Legal Name: Nyingi Enterprises Corp. (S-Corp)

SAM UEI: V1Q7UE8UBVY6 | CAGE: 9SRW4

Socioeconomic:
- Economically Disadvantaged WOSB (EDWOSB) & WOSB
- Small Disadvantaged Business (SDB)
- Black American / Minority-Owned SB
- SBIR/STTR Eligible (0% VC/PE owned)

Registered Office: 9 Mayflower Ln, Shelton, CT 06484

Western Hub: Salt Lake / Wasatch Front, UT

Web: www.nyingienterprises.com

NAICS & PSC CODES

541715 — R&D in Physical, Engineering, & Life Sciences (Primary)
541511 — Custom Computer Programming
541519 — Other Computer Related Services
541611 — Management & Audit Consulting
541690 — Scientific & Technical Consulting
518210 — Data Processing & AI Curation
611430 — Professional & Clinical Training
621999 — Misc. Ambulatory Health Care

PSC: 7A20, R425, B544, U009, AN11

KEY PERSONNEL

Teresa Coon, RN — Founder & CEO
22+ years Registered Nurse (RN) across Yale New Haven Hospital, Raymond G. Murphy VA Medical Center (Inpatient Psychiatry), Genesis Healthcare & Montebello (Skilled Nursing/Rehab), Lovelace Women's Hospital (NICU), and ICU/Med-Surg/Cardiology (BLS/ACLS/NRP certified). Leads corporate operations, VHA/CMS clinical documentation integrity (CDI), medical record audit, and clinician-in-the-loop AI data curation.

Joshua Coon, Ph.D. — Co-Founder & CTO
Ph.D., M.S., B.S. in Physics & B.S. Math (Univ. of Utah). 14+ yrs AI/ML leadership: Principal Enterprise AI Architect (HCLTech), Principal Data Scientist (Deltek), Lead Healthcare IDP Developer (Eviden), SVP AI/ML Lead (iCapital), AI Researcher (Lockheed Martin), Senior Technical Staff & $600k SAR PI (Sandia National Labs). 20+ papers & presentations.

EXECUTIVE SUMMARY

Nyingi Enterprises Corp. is an Economically Disadvantaged Woman-Owned Small Business (EDWOSB), WOSB, and Small Disadvantaged Business (SDB) delivering secure, high-assurance Artificial Intelligence, Machine Learning, Intelligent Document Processing (IDP), and Clinical Documentation & Audit solutions to Defense, Federal Civilian, and Commercial enterprises. Combining a Ph.D. Enterprise AI Architect (Sandia, Lockheed Martin, iCapital, Deltek, HCLTech) with a 22-year VA and tertiary-hospital Registered Nurse executive (Raymond G. Murphy VAMC, Yale New Haven Hospital), Nyingi bridges frontier AI engineering with rigorous domain verification across the entire lifecycle—from R&D ideation and formal verification to air-gapped production deployment.

CORE COMPETENCIES

- **Secure Local LLM/SLM Fine-Tuning & Agentic AI Workflows:** Full-rank and parameter-efficient (LoRA / IA3 / HuggingFace PEFT) fine-tuning of open-source LLMs and Small Language Models (SLMs) deployed locally inside closed/VPC or FedRAMP-aligned environments. Production multi-agent architectures using LangGraph, LangChain, Model Context Protocol (MCP), Retrieval Augmented Analysis (RAA), and automated ROUGE/BLEU/semantic benchmarking.
- **Intelligent Document Processing (IDP) & Healthcare Record Automation:** End-to-end automated extraction, classification, OCR indexing, and table/entity parsing for complex healthcare, financial, and procurement records using Microsoft Document Intelligence, PyTorch, and custom transformer pipelines—built to keep sensitive PII/PHI/CUI off public commercial LLM servers.
- **Formal Verification (Lean 4), Trustworthy AI & Defense Autonomy:** Neuro-symbolic translation of natural-language specifications into formal deductive systems (Lean 4 proof kernels & SMT verification), cryptographically auditable model training (Merkle-tree/hash-chained protocols), reinforcement learning (TD3/OpenAI Gym) for autonomous control, and GAN/Capsule Network synthetic radar (SAR) & satellite imagery.
- **Clinical Documentation Integrity (CDI), Medical Audit & Expert Curation:** RN-led inpatient/outpatient Clinical Documentation Integrity (CDI) training, Medicare Parts A/B/C/D & Medicaid chart completeness and medical necessity review, VHA VistA/CPRS workflow consulting, and Clinician-in-the-Loop (RN/MD/CPC) RLHF and ontology verification to eliminate LLM hallucinations.

RELEVANT PAST PERFORMANCE & LEADERSHIP TRACK RECORD

- **Enterprise SLM Fine-Tuning, Prompt Engineering, & AI Governance (HCLTech, ServiceNow/Accenture, Samak Press):** Spearheaded Small Language Model (SLM) fine-tuning pipelines (HuggingFace PEFT/LoRA, Microsoft Document Intelligence) benchmarked against human SMEs; delivered LLM prompt engineering & evaluation frameworks supporting ServiceNow (via Accenture/partner), authored a 12-chapter Enterprise AI Governance & Cybersecurity Playbook. Also solo-architected and deployed ~$1.1M+ in production full-stack AI/compliance SaaS applications, including a ~$1M ($750K–$1M+) Materials Testing & Compliance platform (Azure SQL, AI agent hardening, automated cybersecurity tests) and Samak Press's ~$132K–$175K Multi-Agent AI Strategy & Advertising Intelligence SaaS platform (12-agent fallback pool, 10-agent adversarial consensus, Ed25519 cryptographic vouchers, Google Cloud Run/Firestore serverless architecture, 150+ automated pytest/Playwright tests).
- **GovCon Retrieval-Augmented Analysis (RAA), Agentic AI, & FedRAMP Security (ICF & Deltek):** Executed Nyingi Enterprises Corp. C2C subcontract supporting ICF to build Retrieval-Augmented Analysis (RAA) pipelines for federal contracting opportunity identification & serve as AI SME (Python, LangChain, Jupyter, VS Code); directed optimization of Deltek's GovCon GenAI assistant ('Dela') using LangGraph and Model Context Protocol (MCP), authoring 30+ FedRAMP LLM security guides.
- **Healthcare & Enterprise Intelligent Document Processing at Scale (Eviden & iCapital Network):** Led healthcare Intelligent Document Processing (IDP) clinical data extraction across Windows/RHEL environments (Eviden); directed a 12-person AI/ML engineering team at iCapital Network whose flagship IDP platform automated >1,000,000 financial/legal documents and saved >$4,000,000.
- **VA Medical Center & Tertiary Hospital Clinical Operations (VAMC & Yale New Haven, 2004–2024):** 22+ years of frontline RN care, chart auditing, and patient education across Raymond G. Murphy VA Medical Center (Inpatient Psychiatry), Yale New Haven Hospital, Genesis Healthcare & Montebello Skilled Nursing/Rehab (Medicare Part A/B post-acute care), and ICU/NICU/Cardiology settings.
- **Defense Autonomy, Radar & National Lab R&D (Lockheed Martin & Sandia, 2013–2021):** Principal Investigator on a $600,000 Sandia National Laboratories grant generating high-fidelity synthetic SAR imagery of military vehicles via GANs; built Lockheed Martin RL radar-location algorithms, BERT aircraft-maintenance root-cause analysis, and AWS EKS IoT anomaly detection.

KEY DIFFERENTIATORS

(1) Dual Defense-AI Ph.D. + VA/Hospital RN Executive Leadership under a WOSB/SDB small business; (2) Air-Gapped / Local-First LLM & SLM Deployment that protects CUI, classified-adjacent data, and HIPAA PHI; (3) Neuro-Symbolic & Lean

4 Formal Verification + Clinician/SME Ontology Curation to guarantee zero-hallucination auditability; and (4) Bi-Coastal Presence (Connecticut & Utah / Hill AFB & VISN 19 corridor).

TECHNICAL STACK & ENVIRONMENTS

Python, PyTorch, TensorFlow/Keras, HuggingFace (PEFT/LoRA), LangGraph, LangChain, Model Context Protocol (MCP), Lean 4, Microsoft Document Intelligence, OpenAI/Azure OpenAI, AWS SageMaker/EKS, GCP Vertex AI, Docker, Kubernetes, FastAPI, SQL, RHEL/Windows, VistA/CPRS & ICD-10/CMS-HCC.
